

Naeveth

Deity

Domain: None -- see variant features below

Pantheon: Court of Trials

Alignment: NE

Symbol: A dagger pointed downward

Worshippers

Murder, assassination, secret killing

Note: Naeveth is a god of murder, not healing. Do not confuse with common mistranslations in Settled Lands texts. His priests are a secretive order of ruthless assassins carrying out duties not for profit but to serve a secret pattern that only the highest ranking among them understand.

Patron to many thieves' and assassins' guilds across Kyrell. Conduct: None publicly stated. The inner doctrine is known only to senior assassin-priests.
